## SUMMARY

Software engineer with experience writing embedded C, implementing communication protocols over CAN, and developing C#/.NET tools for controller programming and diagnostics.

## TECHNICAL SKILLS

**Languages:** C, C#, Python
**Embedded:** CAN, CANopen, FreeRTOS; C integration with Simulink
**Tools:** .NET, Git, CANalyzer, Vector CAN hardware
**Testing:** CMock, NUnit, hardware validation, CAN trace analysis
**Development:** Ubuntu/Linux, Jenkins build troubleshooting, Azure DevOps

## PROFESSIONAL EXPERIENCE

**Hyster-Yale Materials Handling** Aug 2024 - Present
Software Engineer 1

*Global Tools Team* Jan 2026 - Present

- Implemented a CAN communication protocol for controller programming.
- Develop C#/.NET desktop tools for controller programming and diagnostics in manufacturing.
- Build CAN controller harnesses and prototype connections; validate programming on physical hardware.
- Used CAN traffic analysis to investigate intermittent controller-programming failures.

*Innovation Team* Aug 2024 - Dec 2025

- Developed C middleware on an ARM-based ECU to connect CAN bus data to a Simulink model, handle CANopen messages, and expose debugging signals.

**Music World** Oct 2013 - Jan 2025
Assistant Manager *Vancouver, WA*

- Led weekend store operations, supervised associates, and trained and mentored staff.
- Created training guides and checklists to support employee onboarding and consistent store procedures.

## ACADEMIC EXPERIENCE

**Software Engineering Capstone** Sept 2022 - May 2023
Industry-sponsored project with Seasalt.AI

- Adapted existing speech-recognition pipelines in Python for Vietnamese and Indonesian.
- Contributed failure-notification hooks for long-running pipeline runs.

**Embedded Systems Coursework** Washington State University

- Used C and FreeRTOS on Raspberry Pi Pico/RP2040 for GPIO control, tasks, and queues.
- SPI exercises covered read/write routines and passing GPIO interrupt data to a task through a queue.
- Used Ubuntu and Bash scripts for development automation during college.

## EDUCATION

**B.S. in Computer Science** Fall 2023
Washington State University *Vancouver, WA*
